Dougie Hawes

About

I have a rare blend of logical and creative thinking, which makes me a natural fit for full-stack web development. I am an artist, and this reflects in how I present the front-end, much like how my vast memory and problem-solving skills reflect in the back-end. My journey into coding started as a curiosity, but years later, it became clear that it was more than just a hobby—it was my calling. Having explored a wide range of languages and frameworks, I found myself gravitating towards JavaScript, and now I think in React. While I lack formal experience, I have built projects that demonstrate my ability to create intuitive, responsive, and dynamic web applications. I am eager to bring my problem-solving mindset and passion for clean, maintainable code to a professional team. Given the opportunity, I am confident I will quickly prove my ability to thrive as a web developer.

Training

- **Self-Paced Learning:** Built and deployed FullStack applications, implementing CRUD operations, authentication, and responsive design using the MERN stack.
- **Self-Paced Learning:** Built and deployed FullStack applications, implementing CRUD operations, authentication, and responsive design using the MERN stack.
- **Self-Paced Learning:** Built and deployed FullStack applications, implementing CRUD operations, authentication, and responsive design using the MERN stack.
- **Self-Paced Learning:** Built and deployed FullStack applications, implementing CRUD operations, authentication, and responsive design using the MERN stack.

Work

LaaDeeDaa

A fullstack site I built for my business where I share the pieces I have created, blog about events, and added links to my Etsy page.

Rock, Paper, Scissors, Lizard, Spock, Russian Roulette

A game I made based on what is seen played in The Big Bang Theory, I had a lot of fun writing the functionality and presentation.

Ridley Colluphid

A music player I have put together to present my singing. Currently populated by hard code until pieces are recorded.
